

Journal of Image and Graphics

CONTENTS

Volume 13, Number 1, 2025

Comparative Analysis of 2D and 3D Convolutional Neural Networks for Medical Ultrasound Image Classification	1
<i>Angelin Beulah S and Sivagami M*</i>	
An Optimized CNN Architecture for Accurate 3D Liver Segmentation in Medical Images	15
<i>Hersatoto Listiyono*, Zuly Budiarto, and Agus Perdana Windarto</i>	
Enhanced Lung Disease Detection using VGG and Spatial Transform Network (STN)	24
<i>Prasanthi A. Yavanamandha*, Srikan B. Kavuri, Sai Moulika C. Bedadhala, Vaishnavi D. Chintaparti, and Sindhu E. Kakumani</i>	
Deep Learning Based Advertisement Replacement on Dynamic Background Videos	34
<i>Cheng Yang*, Fucheng Zheng, Duaa Zuhair Al-Hamid, Peter Han Joo Chong, and Patrick Lam</i>	
Automatic Classification of Respiratory Sounds Based on Convolutional Recurrent Neural Network and Bagging k-Nearest Neighbor	46
<i>Koki Minami, Huimin Lu, Tohru Kamiya*, and Shoji Kido</i>	
Multi-classification of High-Frequency Oscillations Using iEEG Signals and Deep Learning Models	52
<i>Zayneb Sadek*, Abir Hadriche, Rahma Maalej, and Nawel Jmail</i>	
Def-UNet with Feature Fusion and Recalibration for Liver Segmentation in Multi-Modality CT Images	64
<i>Bindu Madhavi A. Tummala and Soubhagya Sankar B. Barpanda*</i>	
Next-Generation Image Segmentation for Enhanced Malaria Detection and Diagnosis	73
<i>Edy Victor Haryanto S*, Bob Subhan Riza, and Agus Harjoko</i>	
Integrating Multi-scale Feature Extraction into EfficientNet for Acute Lymphoblastic Leukemia Classification	83
<i>Fallah H. Najjar*, Salman Abd Kadum, and Nawar Banwan Hassan</i>	
Digital Image Steganography and Reversible Data Hiding: Algorithms, Applications and Recommendations	90
<i>Heba Ragab, Hassan Shaban, Kareem Ahmed*, and Abd-Elmgied Ali</i>	
MSP2P: Multi-Scale Point-based Approach for Optimal Crowd Localization Through Perspective Analysis	115
<i>David Redó Nieto*, Mikel Aramburu Retegui, Jorge García Castaño, and Antonio José Sánchez Salmerón</i>	
Investigating Hybrid Quantum-Assisted Classical and Deep Learning Model for MRI Brain Tumor Classification	123
<i>Anandhavalli Muniasamy*, Salma A. S. Alquhtani, Afnan H. Alshehri, Arshiya Begum, and Asfia Sabahath</i>
