

Journal of Image and Graphics

CONTENTS

Volume 13, Number 5, 2025

Optimized Heart Disease Image Classification on Edge Devices Using Knowledge Distillation and Layer Compression	459
<i>Yogendra N. Prajapati*, Dev Baloni, and Avdhesh Gupta</i>	
Evaluating Facial Emotional Proportion Based on Computer Vision Technique	469
<i>Lujain Y. Abdulkadir*, Hiba A. Saleh, Omar I. Alsaif, and Rana K. Sabri</i>	
CenterFormer: Coupling CenterNet and Vision Transformer for Accurate Wheat Head Detection	476
<i>Ekei Harimoto and Xian-Hua Han*</i>	
Binomial Dropout Convolutional Neural Network Classifier-Based Micro-expression Recognition System	489
<i>Anjani S. D. D*, M. K. Kumar, Chinnam Sabitha, P. V. V. S. R. Kumari, and Sasi R. Desabathula</i>	
An Approach to the Problem of Calculating Target Scores Using Camera to Support Shooting Training	502
<i>Minh H. Nguyen*, Long Q. Trinh, and Tuan D. Nguyen</i>	
Performance Comparison of YOLOv8, YOLOv5 and YOLOv11 in Nature Image Segmentation	515
<i>Timothy Harminto*, Dimas F. Najib, Pandu Wicaksono*, and Zahra Nabila Izdihar</i>	
Evaluation Study for the Performance of PSO and AOPSO Algorithms in Optimizing the SVM Classifier	521
<i>Asaad Noori Hashim, Safaa Jasim Mosa, Abbas F. H. Alharan, and Ahmed J. Obaid*</i>	
Comprehensive Analysis of Feature Detectors and Descriptors for Stitching UAV Images with Perspective Distortion	528
<i>Mark P. B. Pacot* and Nelson Marcos</i>	
Performance Comparison Analysis of Random Forest, Support Vector Machine, and AdaBoost in Arrhythmia Classification	540
<i>Melinda Melinda*, Muhammad Raja, Junidar Junidar, Rizka Miftahujannah, Siti Rusdiana, and Muhammad Irhamsyah</i>	
Deep Learning Model for Automated Heart Disease Diagnosis Using ECG Signal	549
<i>Munji Gayathri* and Suresh Chittineni</i>	
Fine-Tuned Object Detection for Mask Recognition Using Green Computing in IoT Systems	561
<i>Yousef Farhaoui*, Ahmad E. Allaoui, Jawad Rasheed, and Onur Osman</i>	
Efficient Few-Shot Image Classification with Unbalanced Sinkhorn Distance for Robust Feature Alignment and Large-Scale Applications	570
<i>Yun Pang and Hayati A. Rahman*</i>
