Journal of Image and Graphics

CONTENTS

Volume 14, Number 4, 2026

A Benchmarking Framework for Fine-grained Multilabel Semantic Segmentation of Mango Fruit Surface DefectsADAPT: General-to-Specific ADAptive Prior Transfer for Hyperspectral Image Reconstruction 532
Maria Jeseca C. Baculo, Conrado Ruiz Jr., and Oya Aran**

Deep2.6GNet: A Lightweight 2.6 G FLOPs Architecture Model for Underwater Image Enhancement 543
May Thet Tun and Tetsuya Shimamura*

Comparative Analysis of EfficientNet-B0 and MobileNetV3-large Architectures for Imbalanced Multiclass Skin Lesion Classification.....551
A.M. H. Pardede, Solikhun, and Juni Ismail*

Comparative Study of Quasi-random Sampling for Brain Tumor Segmentation in MRI Using Expectation-Maximization (EM) and Region Growing.....567
Boucenna Sidahmed, Z. Chama, N. Taleb, B. Hachemi, and E. B. Bourennane*

FLARE: Fisheye Lens Anchor-based Radial Enhancement for Internal Vibration Compensation in Low-cost Drones..584
Yassir Zardoua, Souha Seghir, Nouha Othman, Rania Othman, and Hadhami Garbouge*

Analyzing the Impact of Preprocessing on Deep Learning-based Brain Tumor Classification Using Glioblastoma Magnetic Resonance Image.....601
Nada Firdaus, Lailil Muflikhah, Rizal Setya Perdana, and Nashi Widodo*

Reinhard-illumination Based Single Scale Retinex for Low Light Images Amelioration 614
*Manar Abdulkareem Al-Abaji and Mohammed Hazim Alkawaz**

Explainable Deep Learning for Cervical Cancer Cell Classification: A Comparative Analysis of CNN Architectures with DenseNet-121 628
Sadek Al Prince, Gazi Mehraj Sakib, Mahe Zabin, Shakila Rahman, and Jia Uddin**

A Dual-attention-based Approach for Student Abnormal Behavior Detection in Classroom Videos 645
Vinothina V, Augustine George, Jasmine Gnanadurai, and Vennila J*

Clustering-integrated Horizontal Pyramid Feature Embedding for In-domain Unsupervised Person Re-identification655
*Abhinav A. Parkhi * and Atish S. Khobragade*

Hybrid CNN-DNN Facial Expression Recognition in an Affective Virtual Reality (VR) and 360° E-learning Platform670
*Anass Touima * and Mohamed Moughit*

Cloud-Net: A Lightweight Convolutional Framework with Spectral-spatial Feature Enhancer for Real-time Brain Tumor Segmentation.....687
*Jyoti Kataria * and Supriya P. Panda*

Multi-view Integration with View-specific Self-attention for Sign Language Recognition 706
*Hoang Quang Huy and Tran Anh Vu**

AI-driven Saliency Modeling for Quantifying Visual Engagement in Tourism Media 720
*Ping Huang, Ratanachote Thienmongkol, and Ruethai Nimnoi **
